NET WEIGHT:..... 463 lb.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his/her own expense.

INTRODUCTION OF THE OWNER'S MANUAL

SEGA ENTERPRISES, LTD., supported by its high electronic technology of LSIs, microprocessors, etc. and a wealth of experience, has for more than 30 years been supplying various innovative and popular game machines to the world market. This OWNER'S manual is intended to provide detailed comments together with all the necessary information covering the operation in general of electronic assemblies, electromechanical servicing control, spare parts, etc. The manual is intended for those who have knowledge of electricity and technical expertise especially in ICs, CRTs, microprocessors, etc. Carefully read so as to acquire sufficient knowledge before working on the machine. Should there be a malfunction, non-technical personnel should under no circumstances touch the interior system.

HANDLING PRECAUTIONS

When installing or inspecting, be very careful of the following points and pay attention to ensure that the player can enjoy the game safely.

- o Be sure to turn the power off before working on the machine.
- o To insert or pull out the plug quickly is dangerous.
- o It is necessary to make sure that the power cord or the grounding wire is not exposed on the road, etc. in a manner so as to be dangerous. Make sure that grounding connections are made safely at the position where specified.
- o Do not use any fuse that does not meet the specified rating.
- o Make complete connections for the IC board and other connectors. Insufficient insertion is very dangerous.

Also, for the IC board circuit inspections, only the logic probe is allowed. The use of a tester is not permitted, so be careful in this regard. After confirming that there are no irregularities, turn the power ON.

PREVENTION OF COUNTERFEITING AND CONVERSION

LABELLING

To prevent counterfeits and conversions, the following labels are put on all the SEGA products. When handling such goods, be sure to confirm the labels. They are used to prevent illegal acts such as the unauthorized copying of the products and the printed circuit boards thereof or carrying on business by manufacturing similar merchandise or by converting, selling or using such products or printed circuit boards.

The following seal is put on the machines manufactured by SEGA

ORIGINAL SEAL

COPYRIGHT NOTICE

This SEGA product has the copyright notice as follows:

© SEGA 1991

This signifies that this work was disclosed in 1991 and is the property of
SEGA ENTERPRISES, LTD.

PRECAUTIONS CONCERNING THE PLACE OF INSTALLATION

This is an indoor game machine. Absolutely do not install it outside. Even indoors, avoid installing in places mentioned below so as to ensure proper usage:

- o Places subject to rain or water leakage, or condensation due to humidity.
- o In the proximity of an indoor swimming pool and/or shower.
- o Places subject to direct sunlight.
- o Places subject to heat sources from heating units, etc., or hot air.
- o Vicinity of highly flammable/volatile chemicals or hazardous matter.
- o Sloped surfaces.
- o Vicinity of anti-disaster facilities such as fire exits and fire extinguishers.
- o Places subject to any type of violent impact.
- o Dusty places.
- o Residential Environment - (See F.C.C. statement below)

F.C.C. REQUIREMENTS

The Federal Communications Commission requires that all Class A equipment be verified and labeled as follows:

This equipment complies with the requirements in part 15 of FCC Rules for a Class A computing device. Operation of this equipment in a residential area may cause unacceptable interference to radio and TV reception requiring the operator to take what ever steps are necessary to correct the interference.

This label must be permanently attached in a conspicuous location and the text must be legible. If this label is removed or tampered with, such action is punishable under Section 503 of the Communications Act of 1934 (ACT), as amended.

NAME OF PARTS ①

- * When transporting the machine on a floor, lift up the 10 adjusters (4 for the cabinet and 6 for the seats) and use the casters.

NAME OF PARTS ②

TOOLS & ACCESSORIES

220-5130	VOL. CONT B-5K OHM.
540-0006-01	WRENCH FOR TAMP PRF SCR DUAL TYPE M4
540-0007-01	WRENCH FOR TAMP PRF SCR DUAL TYPE M5
540-0009-01	WRENCH FOR TAMP PRF SCR DUAL TYPE M8
839-0016	ASSY SWITCH BOARD

HOW-TO-INSTALL THE SEATS

Insert SEAT LEFT PIPE in the cabinet hole (A) and SEAT RIGHT PIPE in the hole (B) and fasten them by using a total of 4 hexagon bolts black (M8 x 50)..... (2 for each seat)..... The seat adjustments can be made within a range of 50 mm.

DESIGN RELATED PARTS

- ① GTR-1054 DESIGN PLATE LASER GHOST
- ② GTR-1014 FRONT GLASS
- ③ GTR-1030 STICKER BILL MAX CAROL
- ④ GTR-1202-F STICKER LEFT
- ⑤ GTR-1202-G STICKER RIGHT
- ⑥ GTR-1202-H STICKER CENTER
- ⑦ GTR-1211-B DESIGN PLATE SHEET BLUE
- ⑧ GTR-1213-A DESIGN PLATE SHEET RED
- ⑨ GTR-1221 STICKER BILL
- ⑩ GTR-1222 STICKER MAX
- ⑪ GTR-1223 STICKER CAROL

SW UNIT

Opening the coin chute door allows the service switch to operate.

The function of each switch is as follows:

TEST SWITCH	Used for displaying SELF-TEST screen modes.
SERVICE SWITCH (Left Player)	Used for the purpose of servicing and increasing the credits without registering on the meter.
SERVICE SWITCH (Center Player)	Used for the purpose of servicing and increasing the credits without registering on the meter.
SERVICE SWITCH (Right Player)	Used for the purpose of servicing and increasing the credits without registering on the meter.
FUSE 4 AMP	Used for the Transformer's secondary voltage (100V) overcurrent protection.
SOUND VOLUME	Used for adjusting the speaker's sound volume.

SIGHTING ADJUSTMENTS (FOR THE GAME MODE)

When the game mode does not appear on the screen
(i.e. when in the GUN ADJUSTMENT mode) :

In this game, GUN SIGHTING data is stored in the BACKUP MEMORY.
However, due to installation or transportation when the machine is
not energized for more than one week, or after making the MAIN BD
adjustments, the following (but not the game mode) will appear.
In this case, make the following adjustments:

1. Pull the left-hand side gun's LASER button, and the target flashes on the upper left side. Direct the gun towards the target and pull the LASER button.
2. The target flashes on the lower right side. Direct the gun towards the target and pull the LASER button.
3. Make similar adjustments to the center and right-hand side gun sighting.
4. After the adjustments, simultaneously push both guns' (left-hand side and center) SPECIAL WEAPON buttons and the game mode will appear.

* Ordinary GUN SIGHTING adjustments can be made by performing the SELF-TEST (refer to the SELF TEST mode).

REMOVING THE CONTROL PANEL

PROCEDURE

- ① Take off the 3 machine screws, black (M5×20) on the cabinet side, which secure the cabinet and the control panel.
- ② Open the coin chute door and take off 2 each of the hexagon bolts (M8×40), spring washers (M8) and flat washers (8.5-22×1.6) which secure the bottom of the control panel.
- ③ Pull the control panel towards you and disconnect the 18 connectors (6 per player position) and remove the entire panel.

REPLACING THE LED BOARD AND THE MOTOR

(1) REMOVING THE COVER

- ① Take off the 16 TAMPERPROOF SCREWS (M4×6) for both sides; and remove the BODY RIGHT/LEFT and COVER RIGHT/LEFT.
- ② Take off the 4 machine screws and remove the gun cover to have the LED BOARD appear (see FIG. 1).

FIG. 1

(2) LED BOARD REPLACEMENT

- ① Take off the 4 machine screws black (M4×10) and the slit.
- ② Take off the 4 S-TITE SCREWS (M4×6), disconnect the CONNECTOR and remove the LED BOARD (sec FIG. 2).

CAUTION :

When assembling, have the slit match the center of the LED.

FIG. 2

(3) REMOVING THE VIBRATION UNIT

- ① Take off the 6 machine screws (M5×8) and pull out the mirror box upwards.
- ② Take off the 2 (M4) NUTs and 2 machine screws (M4×14), then remove the vibration unit (see FIG.3).

CAUTION:

When removing the VIBRATION UNIT, be sure not to lose the 2 SPACERS.

When installing the VIBRATION UNIT, be sure to apply the NUT(s) and a commercially available adhesive agent used for screws.

(4) REMOVING THE MOTOR

- ① Take off the 4 machine screws (M3×6) and remove the MOTOR COVER.
- ② Take off the 2 SET SCREWS (M3×4) and remove the MOTOR WEIGHT.
- ③ Take off the 2 machine screws (M2×5) and remove the MOTOR.

CAUTION:

When replacing the MOTOR, be sure to wind a new cushion around the motor.

When installing the MOTOR WEIGHT, make sure that the SET SCREW (M3×4) and the MACHINE SCREW (M2×5) do not make contact with each other.

FIG. 4

REPLACING THE SHOT SW.

- ① Take off the CAP NUT, SPRING WASHER and FLAT WASHER (M4), then 2 TAMPERPROOF SCREWS (M5×30) and 2 NUTs black (M5).
- ② Remove the, HANDLE GRIP and replace the SW. BOARD (see FIG.5).

CAUTION:

When the grip is removed, the parts inside will be in a disassembled condition, therefore, be careful so as not to lose them.

After replacing the SW., make sure that both the LASER SW. and the SPECIAL WEAPON SW. turn ON/OFF accurately.

FIG. 5

REPLACING THE VOLUME

(1) REMOVING THE VOLUME FOR VERTICAL DIRECTIONS

- ① Take off the 2 machine screws (M4×12) and remove the VOLUME together with the VOLUME PLATE (see FIG.6).

CAUTION:

For removing the VOLUME, see page 19 .

FIG. 6

(2) REMOVING THE VOLUME FOR HORIZONTAL DIRECTIONS

- ① Take off the 2 machine screws (M5×10) and remove the VOLUME together with the VOLUME BRACKET (see FIG.7).

CAUTION:

For removing the VOLUME, see page 19 .

FIG. 7

(3) REMOVING THE VOLUME

- ① Take off the 2 SET SCREWS (M3×8) and pull out the GEAR.
- ② Take off the NUT (M9) and remove the VOLUME from the VOLUME PLATE.
- ③ Take off the VOLUME RING from the VOLUME.

FIG. 8

(4) ADJUSTING THE VOLUME

- ① Loosen the 2 machine screws (M4×12) for the VOLUME for vertical directions or the 2 machine screws (M5×10) for the VOLUME for horizontal directions, then move the PLATE or BRACKET.
- ② Move the PLATE or the BRACKET and disengage the GEAR and the ADJUSTMENT GEAR. By turning the VOLUME and as shown in FIG.9, have the VOLUME's cut portion face the direction opposite to the ADJUSTMENT GEAR.

- ③ Fasten the 2 machine screws ($M4 \times 12$) for the VOLUME for vertical directions or the 2 machine screws ($M5 \times 10$) for the VOLUME for horizontal directions. At this time, make backlash adjustments (see FIG. 9).
- ④ Slowly vibrate the gun in vertical/horizontal directions and check to see that the gear movements did not result in exceeding the VOLUME's turning range.
- ⑤ For fine adjustments, refer to the TEST MODE.

FIG. 9

REMOVING THE GUN

PROCEDURE

- ① Take off the 4 HEXAGON BOLTS (M8×35) AND THE 4 SPRING WASHERS (M8) which secure the 2 mechanism holders.
- ②③ Take off a total of 6 TAMPERPROOF SCREWS (M4×6) which secure the 2 mechanism covers.
- ④ Take off the 3 machine screws black (M4×18) which secure the DESIGN PANEL. Loosen the 4 upper TAMPERPROOF SCREWS (M4) and remove the PANEL.
- ⑤ Take off a total of 4 machine screws (M4×16) which secure the 2 holders.
- ⑥ Take off the 2 machine screws (M4×16), disconnect the 5 CONNECTORS for wiring and remove the GUN MECHANISM.

CLEANING THE MONITOR

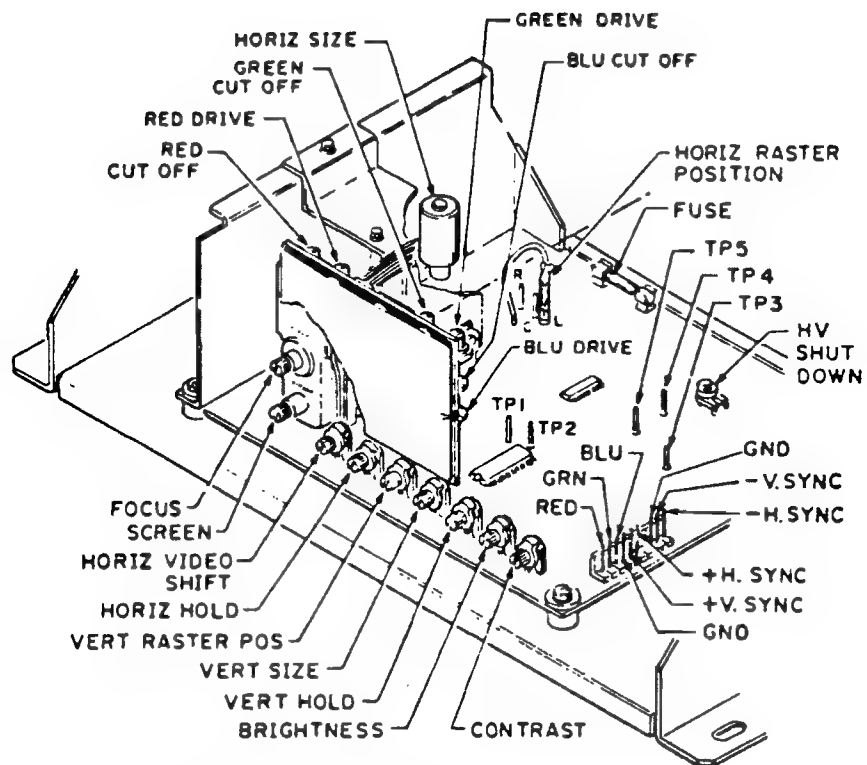

Take off a total of 6 machine screws black which secure the glass stopper (UP and DOWN), take out the FRONT GLASS and clean the monitor screen and the mirror.

REPLACING THE FLUORESCENT LAMP

FLUORESCENT LAMP REPLACING PROCEDURE

Take off the 4 machine screws black (M4×12) which secure the BILLBOARD HOLDER, remove the DESIGN PLATE and replace the 20W FLUORESCENT LAMP.

MONITOR ADJUSTMENTS

TEST MODE

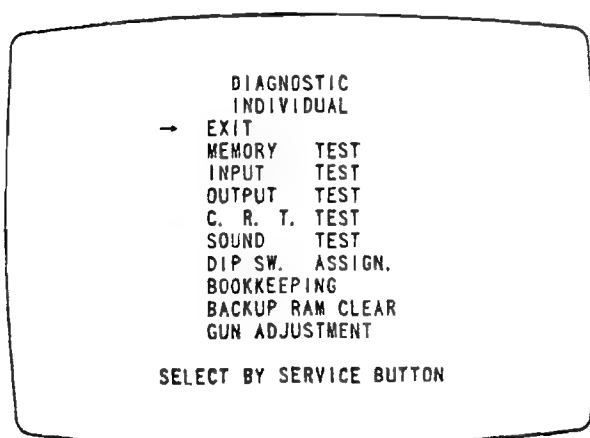

This test mainly checks the operation of game PCB's, discovers defects if any, and also checks monitor colors and audio quality. In addition, the test indicates dip SW assignment and has a Bookkeeping function.

TEST PROGRAM

- (1) Memory Test : Checks the EPROM programs and RAM Area.
- (2) Input Test : Tests the operation of COIN, LASER, SERVICE switches, etc.
- (3) Output Test : To check LASER, MOTOR function.
- (4) CRT Test : To check the on-monitor colors.
- (5) Sound Test : Checks the quality of the synthesized sound transmitted from the PCB.
- (6) Dip Switch Assignment : Indicates dip switch assignments.
- (7) Bookkeeping : Indicates data on average score and play time.
- (8) Backup RAM Clear : Clears Bookkeeping memory.
- (9) GUN Adjustment : GUN SIGHTING ADJUSTMENT.

1. Selection of TEST ITEMS

- (1) Push the TEST SW to cause the following TEST ITEM MENU to appear :

- (2) By pushing the LEFT SERVICE SW, bring the arrow mark "→" to the desired item and press the TEST button.
- (3) When the test has been completed, bring "→" to EXIT and push the TEST button.

2. TEST ITEMS AND DESCRIPTION

(1) MEMORY TEST

ROM TEST		MEMORY TEST			
A	4	GOOD	A	5	GOOD
A	6	GOOD	A	7	GOOD
RAM TEST					
IC	6	GOOD	IC	5	GOOD
IC	36	GOOD	IC	34	GOOD
IC	33	GOOD	IC	42	GOOD
IC	41	GOOD	IC	35	GOOD
IC	69	GOOD	IC	70	GOOD
EXIT BY TEST BUTTON					

Checks the PCB's MEMORY ICs.
When the IC is in good operating condition, "GOOD" will be indicated. If there exists any malfunctioning of the IC's, "BAD" will be indicated.

(2) INPUT TEST

INPUT TEST			
	LEFT	CENTER	RIGHT
COIN SW			
SERVICE SW			
LASER			
SPECIAL WEAPON			
V VOL	5C	62	48
H VOL	41	6F	CE
EXIT BY TEST BUTTON			

- ① Operate each switch. When the "OFF" condition is changed to "ON", the corresponding switch is in good working order.
 - ② However, when the value shown is lower than 00 or higher than FF, make VOLUME adjustments.
 - ③ However, when the value shows lower than 00 or higher than FF, make VOLUME adjustments.
- * For gun sighting adjustments, refer to ITEM 17.2. (9) GUN ADJUSTMENT.

(3) OUTPUT TEST

Check for the LASER beam and VIBRATION MOTOR functions. Press each player's LASER button to have them function.

(4) C. R. T. TEST

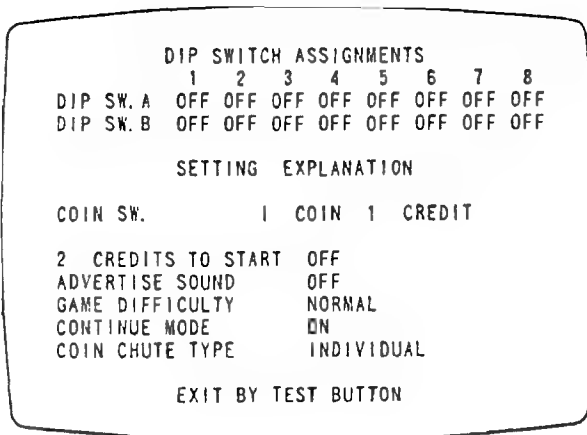

- ① C. R. T. POSITION
Checks the C.R.T. position. Make sure that the on-screen corners are consistent and then make size adjustments.
- ② color check
(The color becomes brighter from the right to the left.)

(5) SOUND TEST

When the test has been completed,
push TEST SW button.

(6) DIP SW ASSIGN

- ① Present setting of each dip switch
- ② Coin switch setting
- ③ OFF: Starts with 1 CREDIT
ON: Starts with 2 CREDITS,
continues with 1 CREDIT
- ④ Advertise sound
- ⑤ Game difficulty
- ⑥ To continue game or not
- ⑦ Type of COIN CHUTE
Normally, turn it OFF to
INDIVIDUAL.

(7) BOOKKEEPING

DIAGNOSTIC BOOKKEEPING (PAGE 1) CREDIT REPORT		
COIN SW LEFT		1
COIN SW CENTER		0
COIN SW RIGHT		1
COIN CREDITS		2
SERVICE SW LEFT		5
SERVICE SW CENTER		1
SERVICE SW RIGHT		0
SERVICE CREDITS		6
TOTAL CREDITS		8
PUSH SERVICE BUTTON		

- ① Usage frequency of each COIN CHUTE
- ② Total COIN CHUTE usage frequency
- ③ Usage frequency of each SERVICE SW.
- ④ Total SERVICE SW. usage frequency
- ⑤ Total credits

Press the SERVICE SW button to display the following :

DIAGNOSTIC BOOKKEEPING (PAGE 2) TIME REPORT			
TOTAL TIME	OH	44M	19S
GAME TIME			
TOTAL	OH	20M	56S
AVERAGE	OH	7M	43S
LONGEST	OH	13M	47S
PUSH SERVICE BUTTON			

- ① Machine's total energized time
- ② Total game play time
- ③ Average game play time
- ④ Longest game play time

Press the SERVICE SW button to display the following :

```
          DIAGNOSTIC
    BOOKKEEPING (PAGE 3)
        SCORE REPORT

AVE. SCORE      870659
TOP  SCORE      1197200
LOW  SCORE      12100

NUMBER OF GAME   5

EXIT BY TEST BUTTON
```

- ① All players' average score
- ② Highest score
- ③ Lowest score
- ④ Total number of game plays

(8) BACKUP RAM CLEAR

```
          DIAGNOSTIC
    BACKUP RAM CLEARE
      → NO
        YES

SELECT BY SERVICE BUTTON

PUSH TEST BUTTON
```

The BOOKKEEPING data can be cleared. When clearing, bring "→" to "YES" and when not clearing, to "NO," by using the SERVICE SW, and then push the TEST button

(9) GUN ADJUSTMENT

- * After replacing the MAIN BD. and repairing the GUN UNIT, be sure to make sighting adjustments in this mode.

ADJUSTING PROCEDURE

- ① Press the LASER button of the GUN that you desire to make adjustments to.
- ② The upper left-hand target flashes. Have the gun's LASER beam match the target and press the LASER button.
- ③ Next, the lower right-hand button flashes. Similarly aim at the target and press the LASER button.
- ④ When you desire to make adjustments for the other guns also, repeat the above procedure ① to ③.

※ COIN CHUTE MODE

INDIVIDUAL :

Used for the cabinet of the INDIVIDUAL COIN CHUTE type which allows each chute to accept coins. For setting COIN/CREDIT combination, use only No.1~No.4 of DIP SW 1 and turn No.5~No.8 OFF. However, when setting to FREE PLAY, turn all of No.1~No.8 of DIP SW 1 ON.

COMMON :

Used for the cabinet of the COMMON chute type in which the acceptance of coins is done in common.

In the COMMON setting, use either COIN LP or COIN CP.
